

An Overview of Franklin County's 2018 Annual Trending

March 16, 2018

The following steps were taken to conduct the 2018 annual trending in Franklin County:

Step 1: Re-Delineation of Neighborhoods

The vast majority of neighborhoods in Franklin County were completely re-examined and, where necessary, re-delineated for annual trending in 2006. Additional re-delineation of some neighborhoods has occurred each year thereafter as further analysis indicated such action was appropriate.

Step 2: Calculation of New Land Values**

As required in the General Reassessment, new land values were established in July, 2014 and have been implemented since that time. No other changes have been made to the land order since that time, except in the neighborhoods where market data indicated the need for an adjustment.

Step 3: Calculation of New Residential Factors & Residential Studies**

Franklin County had no location cost multiplier change from 2017 and updated the depreciation year to 2018 as well as the updated cost tables per the Department of Local Government Finance. Further, a preliminary ratio study was then conducted for improved residential properties at the township level. This study dictated which property classes required further analysis, stratification, reassessment or calculation of a new neighborhood factor. In some instances, especially in rural areas of Franklin County, the preliminary ratio study indicated that assessments were both accurate and uniform. In other neighborhoods, further review was required. This year, townships were grouped together by geographic location and similar improvement types, as has been the case historically. Posey, Laurel, Blooming Grove, Salt Creek, Metamora, and Butler Townships comprise the West grouping and Fairfield, Bath, Springfield, Highland, and Whitewater Townships are included in the East grouping for improved residential class and were trended as two distinct groups. Brookville Township (which houses Brookville City) and Ray Township (which houses Batesville City) are stand-alone Townships in the ratio study.

Step 4: Updated Commercial & Industrial Improvement Values**

Franklin County had no location cost multiplier change from 2017 and updated the depreciation year to 2018 as well as the updated cost tables per the Department of Local Government Finance.

****Please note every attempt was made to ensure a representative sample for each property class. However, given the very low sales activity for all commercial and all industrial property in Franklin County, insufficient usable sales data was yielded even when attempting to expand the sales window back to 2013 for calculating ratio study statistics.**
